Survival Planet is a 3D survival game that focused on surviving, crafting and finding other crew of the starship on the earth like planet called Aldebaran. The player start as a survivor of the fallen starship who safely landed on the planet using an escape pod. When start the game, player will have only a single axe in his inventory to help him survive the environment. As the player proceed more into the game they will required to gather material to craft items such as tools, weapons, clothes, part of building, and more while gathering food and water, avoiding or hunting wild animals, and searching for other survivor.

The game currently features:

- Basic Survival such as hunting, crafting and gathering items
 - A single Island map
 - 4 kinds of dangerous animals
 - 2 kinds of Alpha Animals
 - 1 Crew member NPC
 - A Story Quest
- Resource like Trees, bushes, stone and crystals

This game needs a lot of work. My opinion is that it was released too early to even be early access. It seems more like a proof of concept than anything. One of the very few games I ended up refunding.
